To Matt Woodson, President  
Okanogan Trails Construction

Dear Matt:

This note is to thank you for the fabulous job you and your company have done in building our roads and trails systems on our Northern Properties. You have been excellent in all aspects including helping us create our trails and road system Master Plan, beautifully designing each of our trails, repairing and rerouting our road system, and constructing our trail complex.

In particular it has been remarkable how trouble free and sustainable our trails are in the heavy rains and storms. The design is so well executed that we sustain virtually no damage. We appreciate that all work has been done on schedule and always within our budgets. Our quarterly maintenance arrangements work very well for making sure the trails and roads are well kept for our community members. We believe your great design and quality construction was the reason that the Desert Mountain Trails System was awarded the Best New Trail System in America in 2012! We look forward to a long relationship with Okanogan, and building many more roads and trails in the future. Please feel free to use us as a positive reference at any time.

Regards, Robert Borsch, Board Member and Trails Development Team Leader
